01 ▶ INTEGRATION OF MANY FIELDS

Necessity of No Return

Modern industrial processes are the osmosis from various areas of today's technology, which we perceive as a system of connected vessels. Clients are provided with control systems(PLC, HMI, SCADA), database applications(SQL, ORACLE) , reporting applications (REPORTING SERVICES) and production management systems (MES). We offer solutions in the field of intelligent buildings(BMS), integrating cells with industrial robots, communication and data exchange between production and business systems(ERP). We are convinced that the synthesis of various fields is the key to full and professional service of modern production facilities.

02

KNOWLEDGE AND EXPERIENCE

OPTIMIZATION AND CONSULTING

KNOWLEDGE

Qualifications of our expert personnel are continuously improved. The obtained information is efficiently integrated in a precisely planned optimization process.

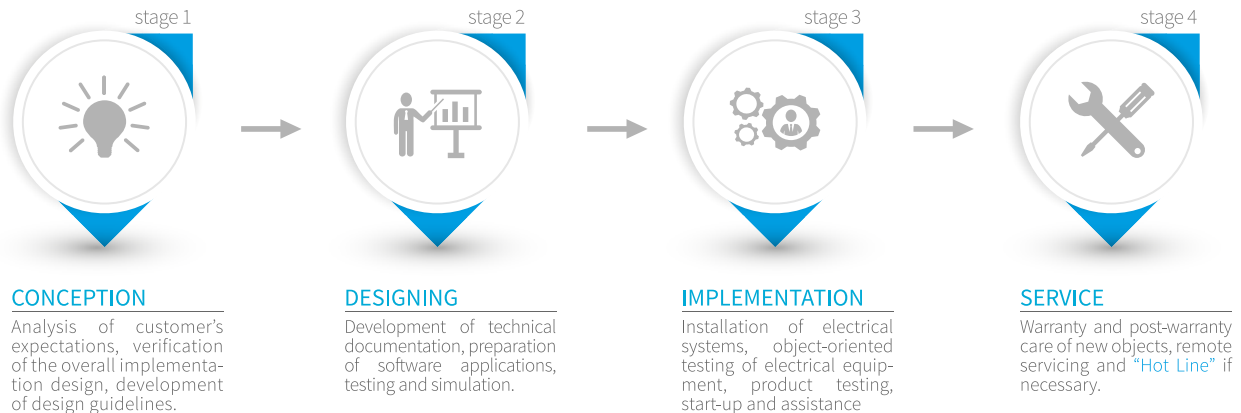

EXPERIENCE

Knowing the market well, we accurately interpret facts and put the right diagnoses. We successfully implement automation and robotic systems and write dedicated applications.

Our strength is Optimal Solutions

Since we do not accept limitations, we have been able to successfully accomplish a number of significant investments for various industries. New projects have been implemented in the following industrial sectors: construction, pharmaceutical, rubber, cosmetics, paper, food, automotive. We willingly undertake work in new areas, assessing the possibilities of development with each new task. We have experience in designing, programming, implementing and servicing automation and industrial robotics systems. Our expertise enables solutions for current and future clients.

03 SAFETY AT ALL STAGES

First of all responsibility

Safety rules are absolutely observed at every stage of the project ensuring a high standard of service. Tests and simulations are performed when creating applications which shortens the period of implementation. During start-up stage our team provides support to eliminate any risks. After completion of the implementation, a remote access to the installation enables quick response to reported warranty or service orders. We take care of archiving and security of confidential information of the project documentation.

04 ▶ CUSTOMER SATISFACTION

01 **CLIENT**
We work for small, medium-sized and large enterprises.

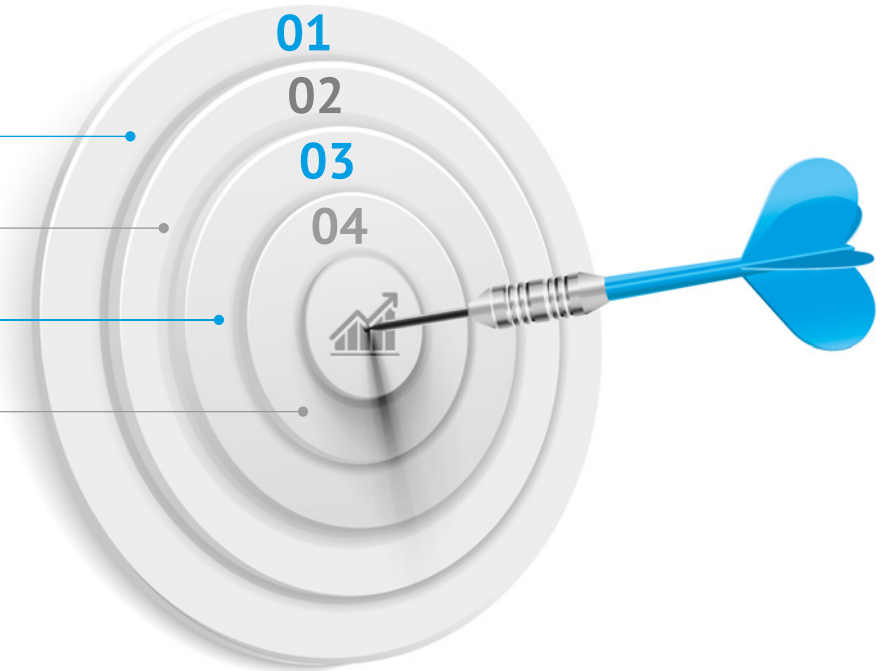

02 **NECESSITY**
We consider the needs and analyze expectations.

03 **SOLUTION**
We implement modern and optimal solutions.

04 **SATISFACTION**
Our relationships with clients are long term.

The most important

Since customer satisfaction is our priority, we constantly improve our skills. The proposed solutions use the latest technologies. We immediately react to changes that may occur at different stages of the project. Received testimonials are the proof of confidence, high quality service and reliability. Credibility and competence are the values that we strongly believe in when doing our everyday job.
